

**BULLETIN NO. 15/16-012      DATE: 15 March 16**

**TO: ALL ISR Drag Racing Affiliates**

**SUBJECT: Drag racing minimum ride height clarification.**

**Sled must have a minimum ride height of three (3) inches measured at the *lowest point of the bulkhead, /skid plate/belly pan*. Measurement point to be centered directly in front of the track drive area, (using the spindle centers to determine center point of bulkhead) and must retain 2 inches of remaining compression travel with driver on snowmobile**
