

BULLETIN NO. 24/25-005 DATE: 27 Jan 25

TO: All ISR Race Affiliates

SUBJECT: ECU This is the revised 2-27-25 Rev Limit Change:
TRANSITION & Jr. Novice

Sorry for any confusion we created

1. SPECIAL NOTICE: SLEDS UTILIZED IN THIS CLASS MUST BE NON-CURRENT, OR A MINIMUM OF (1) ONE MODEL YEAR OLD.
2. The rules committee may at any time during the racing season, review the restrictions of the designated models if a brand is dominating the class. Stock legal production 600 cc Super Stock race snowmobiles will be the format for Junior Novice classes. These sleds will be developed with specific manufacturer-based modifications and restrictions. The snowmobiles will be raced as produced with only the following changes.
3. This class will follow all the rules for the stock-based snow cross class.
4. *Electronic control unit ECU will be reprogrammed with rev limit restrictions (rev limited to maximum 6500 RPM) (Exception Polaris and Arctic Cat rev limited to maximum 6600 RPM) (Exception Polaris 2020 and older sleds can be 6700 RPM)*
5. Restricted throttle kit not to allow more than 50% throttle opening must be installed designated throttle kit part numbers will be supplied by brand.
6. The exhaust valves will be blocked in the shut position.
7. *Primary clutch engagement will be 4000 Max RPM) (Exception Polaris and Arctic Cat rev limited to maximum 4100 RPM) (Exception Polaris 2020 and older sleds can be 4200 RPM) (measured with secondary Sheave movement)*
