

BULLETIN NO. 24/25-008 DATE: 5 May 26

TO: ALL ISR Drag Racing - Speed Run Affiliates

SUBJECT: 2026 Drag Racing - Speed Run Rule's Meeting Clarifies Status of Steel Stud Rule for 2027-2028 season

FOR IMMEDIATE RELEASE

International Snowmobile Racing Clarifies Status of Steel Stud Rule for 2027-2028 season.

The International Snowmobile Racing (ISR) would like to address recent misunderstandings regarding a proposed rule involving the use of steel studs only in select racing classes.

At the most recent ISR Rules Meeting, a **proposal was introduced** to allow **Only steel studs in Pro Stock 1000 and select lower classes**. This proposal was brought forward with the intent of exploring **cost-reduction opportunities for racers**, while aligning with practices seen across multiple motorsports disciplines, including:

- Ice Oval Racing
- Enduro Racing
- Hillclimb Racing
- Snocross

It is important to emphasize the following:

- This proposal will NOT be implemented until the 2027-2028 season.
- It will NOT affect the 2026–2027 racing seasons.
- The proposal can be reviewed by our affiliates for feedback and input.

As part of ISR's standard governance process, the proposal will be distributed to all ISR affiliates for evaluation. Each affiliate organization will have the opportunity to review the concept and provide input based on their respective racing programs and membership.

The proposal may be revisited and formally reintroduced for discussion and vote at the 2027 ISR Rules Meeting, this also means this rule can be changed or modified at this time.

ISR remains committed to a transparent, collaborative process that supports the long-term health of the sport, balances performance and safety, and considers the economic impact on racers.

For any questions or additional clarification, please contact ISR directly or reach out to your respective affiliate organization.
