

BULLETIN NO. 26/27-001**DATE: 17 June 26****TO: All ISR Racing Affiliates****SUBJECT: *ISR RACE AND TECH DIRECTORS SCHOOL.*****ISR Race Director & Technical Director Schools Are Coming to You!**

ISR is excited to announce that we will once again be bringing our Race Director and Technical Director Schools to locations throughout the snowmobile racing community. These hands-on training sessions provide the latest technical information, rule updates, procedures, and enforcement standards to help ensure consistency and professionalism across all ISR-sanctioned events.

This is a must-attend training school. Every affiliate is required to have at least one representative present at each event who has successfully attended an ISR training class. To ensure officials remain current on the latest procedures, rules, and updates, attendance is required at least once every two years.

Each affiliate organization is invited to send **up to Four representatives** to attend. Organizations wishing to send additional personnel must receive prior authorization from the ISR office.

Participation in these schools is critical to ensuring the fair and consistent enforcement of ISR race rules. Proper rule enforcement, as published on the ISR website, is also a requirement of the ISR insurance program.

Please be sure to submit the **full names and correct spelling** of all attendees when registering.

We look forward to seeing you at one of our 2026 schools and working together to continue providing safe, fair, and professional snowmobile racing across all ISR affiliates.

School Curriculum

The 2026 Race Director and Technical Director School will feature hands-on instruction covering four major areas of race operations and technical inspection.

Session 1 – 120 & Four-Stroke Technical Inspection

All four major manufacturers now offer a 120/Four-Stroke snowmobile, and Briggs & Stratton has entered the program with a spec racing engine. This session will cover:

- Kitty Cat inspection procedures
- Four-stroke technical inspection procedures
- Common violations and enforcement practices
- Lessons learned from several years of 200 Stock competition
- Areas requiring additional attention during technical inspection

Session 2 – Fuel Testing & Enforcement

This session will provide detailed instruction on:

- Fuel testing procedures
- Approved standards and specifications
- Enforcement protocols
- Penalties and corrective actions

Session 3 – Technical Updates & Rule Enforcement

A review of current technical issues, rule interpretations, inspection techniques, and procedures designed to ensure consistency among all ISR affiliates.

Session 4 – Race Operations & Administration

Topics include:

- Race procedures and preparation
- ISR insurance requirements
- Waivers and documentation
- Accident reporting procedures
- Event management best practices
- Official responsibilities
